The following naming convention was used for these images.

For example, a file named t061r01e4fi01.pdf is a PDF version of the original scanned map. It represents:

- Township (061)
- Range (01)
- Direction (e = East or w = West)
- Fourth Principal Meridian (4)
- It is a FULL Township (f) or Range [versus a HALF (h)]
- It is an Independent (i) survey (see the table below for plat types).
- It is image number one (01) of ? images (including meanders on back) for that township. There may be several images per township depending on the number of resurveys, island surveys, meanders on the back of a map, etc.

jch (10-7-04)

Plat type	Plat Type Abbrev
completion	c
dependent	d
diagram	f
extension	e
independent	i
island	l
Meanders occur on the backside of map.	m
