Corner History:

10-1853 Gov't Notes William A. Jones, Deputy Surveyor North between sections 25 and 26. 80.00 chs. Set post corner to sections 23-24-25-26. Burr Oak 15 in. N15ºE 1310 lks. Made mound and dug trench.

5-1877 Thomas Hunter (Book A P. 312 No. 306), County Surveyor, states that the corner was gone. Set a temporary point near the corner of the fence where Mr. Lorenzo Schemerhorn claimed the corner once stood. Set a stake at the 1/16th West.

5-1877 Thomas Hunter (Book A. P. 313 No. 307) measured North 40 chs. to set 1/4 Cor. 23-24.

4-1878 Thomas Hunter (Book A. P. 336 No. 330 and Old Field Book 5 P. 52) used the intersection of the fences East, North and South as the Corner. Drove stake. Used the corner to set 1/4 Cor. 24-25 midway (39.835 chs.) and at Gov't measure from the bearing tree standing. He indicated that 1/4 Cor. 24-25 was approx. 16' North of the straight line between the section corners.

1973 County Surveyor set a steel fence post at the corner of the fence E-W-N and used the corner to set 1/4 Cor. 24-25 as per Hunter Survey No. 330; that is, midway (2626.74) and at Gov't measure from the bearing tree still standing which placed the corner at the corner post and approx. 14' North of the line between the section corners.

10-6-1978 County Surveyor found that the steel fence post set in 1973 had been removed. Set a Cast Iron Cap on a square pipe as the corner in line with the fences E-W-N. Measured North 2638.18 to 1/4 Cor. 23-24. The corner falls in a swampy area so could not dig.

5-6-2002 County Surveyor found cast iron cap on telspar pipe up 1.0' in good condition. Corner is North of wooden post w/sign.
