Certificate of Location of Government Corner

ID#:533404 **Description:** S 1/4 SEC COR 34 53 **Date Set:** 11/13/1984 **County:** Olmsted

Section: 34 **Township:** 105N **Range:** 13W **Monument Description:** Cast Iron Cap on telspar pipe

Reference Ties:

The monument is down 2'
This corner is located by GPS measurement

Corner History:

Gov't Survey tie of 1.80 = 118.80 to a stone 3 x 13 x 14 at North 2-3 Sumner Township, Fillmore County.

11-8-1984 N2-3 Sumner Twp: Olmsted County Surveyor dug as follows from point 118.8 West of old post found at S 1/4 cor. 34. Found post stub appx 120.3 West of old post. Did not find evidence of Gov't stone. Believe post stub only post in old E-W fence.

11-9-1984 Olmsted County Surveyor, corner falls in open field. Fences removed and all plowed over. Aerial photos show there was once fence North, West and East here and a fence running South 150' ± 10' West of the fe North. Set up a point midway and on line between S sec. Cor. 33-34 (CIM) and S sec. Cor. 34-35 (CIM). Line from the N 1/4 over the fence at the center 34 came 5' West of M & L and line from SW 34 over the fence at the 1/16 E came 6' South of M & L so we dug SW 1/4 of the M & L pt. First. Found a fence post hole and dug North to establish fence line. Found one more post stub 7' North of the first. Did not find any more posts North of this. Dug South and found the corner post and also the first post West of the corner post. Line of fence running N-S in ± 5' West of midway on the SE'ly side of the corner post appx 1 1/2' SE we found the stub of another post which began at the clay line and ran down 2'. It had an odd shape being pointed at the top and 5 1/2" at the bottom and charred at the bottom and dug in. There was 1 1/2' of black dirt over clay in the old fence line dig as follows: Did not have time to expand on CP area today.

11-13-1984 Olmsted County Surveyor extended dig at corner post found for 8' + East. Found another post hole 1 1/2" East of the odd post and another smaller post mark 2 1/2' East and 1' North of the odd post found 11/9/84. Found nothing further. N2-3 Sumner Twp: Dug to find fence corner scaled on aerial photo 150' ± West of fence at S 1/4 34. Dug as follows: We first found a large limestone dug deep into clay with iron rod through it wrapped around pipe on East side. This all apparently a dead man for a post to the West. Found two post markers 1 1/2' West. Took these markers as corner post area and dug West and found next post. Then dug South 15' to find evidence of fence South but could find no posts or holes. Extended hole East on fence line and found large hole with post set in gravel brought in from somewhere. After digging out gravel and post found large rust mark 1.0 North and .3 E of post location, but was already so deep it only ran a few inches and could not tell if it may have been pipe mark or mark of cast iron. Dug South from this post but still could not find fence posts or marks, but did find a limestone 2 1/2" x 9/11 x 16 lying flat 8 1/2' South of post. Could not prove this to be a corner although within reasonable dimensions for stone. (Post in gravel 151 1/2 West of final S 1/4 34).

11-13-1984 Olmsted County Surveyor dug 118.8 East of post set in gravel at N 2-3 and in E-W fence line but found nothing. Accepted fence corner found as best perpetuation of corner there and set a cast iron cap on telspar pipe as the corner at location of old post stub (down 2').

11-16-1984 Olmsted County Surveyor 1/4 cor. 2-3 sumner twp found 1 1/2" x 2 1/2" x 30" O.H. Case iron. The iron was leaning N.E. badly because the CP to fences E-W-S was dug in beside the iron. Plumbed the iron up. It now stands on the SE side of corner post (up 1'). The iron lines with fences South and East but is ± 1' South of fence line West. RP: Spike in power pole East 19.61

11-4-2010 Olmsted County survey crew found CIC in good condition
