A professional land surveyor should make the decision whether to use any existing survey monument or the computed intersection of quarter lines.

**Reference Ties:**

**Corner History:**

6-1913 D.W. Williams P.224B found boulder with cedar stake beside it on line N-S fence and 2' south row willows running E and W accepted as center section covered by flat rock. Run and meas line from E 1/4 25 over this corner to set W 1/4 25 2640' each. On staking line from center west (object of survey) found several old posts on line. Line at west end came a few feet north of old fence. Claimed by fraser in 1902 as in line corner stone he easily found. Williams W 1/4 25 doubtful.

9-8-1978 County Surveyor dug from the main line of the fence south (local line came 2' east) east for 7. Dug from I-90 R/W south for 4-1/2' by 1-1/2' deep to clay. Found nothing. Used line of willows running west to set up location N-S since D. Williams found a stone 2' S of the willow row and under N-S fence.
