Pages 54 & 73 traverse into

Page 75 May 30, 1979: Dug out  4' by 4½' deep to clay. Found the C.H.D. 2x2 hub with tack (removed) which would be .65 North and 2.25 East of the iron (removed) set by the C.S. in 1972. Although the C.H.D. had dug to clay over appx a 3'-4' diameter area around their hub, after scraping the area we found a possible stake hole extending 6" into clay and coming to a point .7 North and 1.5 East of the C.S. iron location. We put a ½"x12" rod in the hole to hold its location.
