Page 76 & May 31, 1979 Underground electricity so could not dig today.

Page 79 + 80 June 1, 1979 Dug with backhoe to cover midway between the gas pipe found at 1/4 Cor 1-2 and the N-S 1/4 line Sec 1 and both the line from the gas pipe to the C.S. iron location at the E 1/4 Cor 1 and also line from the gas pipe to the boulder found at the Center 1. We found the stone refered to by the C.H.D. shattered 3' deep with their 2x2 hub along side. We removed the stone pieces and found a good stake hole extending well into clay. We set a twisted 3/4" iron over the stake hole and packed the stone pieces and 2x2 hub around it. The stake mark is 4.2 North and 8.5 East of the t.n. and in line with the fence North on the East side side of the driveway. A 3/4" iron stood 1.05 N and .65 E (in the blacktop - removed) of the

stake mark location. The stake mark is very near midway and on line from the gas pipe at 1/4 Cor 1-2 to the boulder found at Center 1.
