1/16th East : 8-7-79 Found a 3½" x 3½" x 2' limestone (up 7") standing on the SW side of the corner post to fence E-W-N It appeared that a piece may have broken off the top of the stone. Removed the stone and dug 2'x2' on the South side of the post. About 2' deep and 1.3 East and .45 South of the stone location, found the remaining 12" of a small post a possible stake of 3" to 4" diameter. Set the stone and stake back at their respective locations.

8-17-1979 (Center 34) We dug from traverse nail (in top of large post) North 3', East 13', and South 4'. Found only 1 mark with the possibility of being a stake mark 1.25 N. and 4.7 East of the traverse nail. We also dug about 3' diameter around the corner post but found nothing.
