1/4 Corner 27-28 Pleasant Grove #532706 105-13 (2)

6-18-1979 Dug from 1½' North of Kern's CIM, North for 8' and East for 7' for stone described by Robert Fraser. Found nothing.

6-20-1979 Dug from Kern's CIM West for 10' and North for 8'. The conditions were poor and on the West side of the hole fill went clear to clay. We did find a square mark (appx 10") in clean clay beneath fill that extended about 6" further before disappearing. This possible corner location is 8.5 West and 2.5 North of Kern's CIM

7-1979 Set temporary point at Center 28 by doubling 1/4 Cor 28-33 (found) over post found at the 5/16th N Then projected line from the 1/16th West of Center 28 (found) over this temp point. At the E 1/4 28 we dug on this line and at platted measure from N-S road of old cemetery. Found nothing.

7-25-79 (See blue Book)

Set a CIM over a 1¼"x22" pipe 5.0 N & 5.0 W. of Kerr CIM (removed) The corner is 9' West of the ℄ of the N-S road and appx 2' South ℄ of old road West (now a driveway), 23½' East of chain link cemetery and 26' South of N. cemetery fence.
