7/16/90 Met Sheriffs Deputies @ 10 AM They walked in to corner with us, one of the Kramer sisters came to watch and antagonize us with airplane sound effects on a tape recorder, and also took pictures. We dug around the stone fd by V. Fangman 3' n & w of C.P. to fence N-S-E the stone was ± 18" x 30" x 24" tall. Just lying in fence ridge it had a notch in top but we decided it was not the corner. We dug on the south side of the C.P. and fd fence E & S down 2' fd nothing further we set C1C1/P2 on south side of C.P. d.95 on diagonal SEly of stone & 1.8' East of stone. We told the Kramer sister that this was the corner. She took a picture and left, we filled the digging back in and left.
