Dug trench per instructions

9-10-84, W 1/4 Cor 18: dug under N-S fence on W. Fraser line from E 1/4 18 to Center 18 (found). Area a bog with water all over except @ Fence ridge.

Found a small stake (1¼" diameter by 12" long) lying flat. Then found 5" diameter post sharpened to a good point with one side flattened, also lying flat. Both about 6" deep. Accepted these as stake and post recorded by Fraser but pumped out by hog. Set CIC/p² as corner at approx location that point of post found and on the line from the E¼ 18 over the Center 18 (This also E-W location assuming W.F. set 1/64 West of Center 18 at proper Govt ~~location~~ proportion)
Drove survey marker sign and post 1.1 West. Corner 1' East of N-S fence and 10½' North of fe. corner complex to fences E-W-N-S. Remains of old post on E side of CIC.
