After finding pointed boulder with wood stake on S. side & Broken Crockery on W. side of boulder at 1/16 Cor. West, we dug again on Oct. 9, 1975 at this Center 35 and found small piece of Limestone standing on edge with glass around bottom of L.S. (stone about 1½" × 8" × 8" possibly broken off) only about 2½' deep in Road, ± 6' N. of ℄. This stone would be close To a straight line from W.¼ 35 over 1/16 boulder & within 1' of being double the distance. However, this might have been set from W. ¼ Cor. 35 at 2640' since it is very close To that distance, but since it lines very good with fence To North We probably should honor it and set S¼ Cor. 35 using it & N.¼ Cor. as found.

10-8-75 (1/16W) Dug with backhoe on N. side E-W road, found boulder stone with stake on S side and reinforcing rod at surface but not open stone (Pottery around stone). Stone 3½' N of ℄ and ½' E of fence N. Set rod back over all.
