Oct. 5, 1978 Co. Surv. and Pat, probed extensively
for stone set by W. Fraser (T. Fraser) We probed
from 12' N. To 18' N. of C.I.M. inplace and
appx. 5' E. and W. of a line due North
of C.I.M. There is a 15" Cherry Tree at the
appx. location of the point which we determined
To be the Fraser location. This location is
on the 1/4 line projected from the West (by Comput.)
and on Meas. from North based on W. Fraser
Survey. Also on line of old fence appx. 800' E.
~~From~~ farther East.
(over)

We could not probe any stone and left the area. (caught hell from (lady?) in House just N-N.W. of Corner location.)

we should look for possible evidence of 1/64 corner To East as set by T. Hunter and found by W. Fraser in 1892. This evidence could help decide status of CIM at this 1/4 Corner.

1/64th East of 1/16th N. of 1/4 Cor 3-4

9/15/78 Dug and found a small boulder (6"x8"x9") 1' deep with trace in clay. There was no stake along side as recorded by W. Fraser (BK.8 P.31). This could possibly be the stone. Dug from the stone for 2½' East, 2½' W, 3' N, and 5½' South. Found nothing further. See Dwg for stone location.

Rochester 1/4 corner 3-4 #640306 (3)
