10-2-1980 1/4 Cor 24-25: Found 1½" pipe up 1' on East side of a 3"x5"x12" limestone with pointed top. The pipe and stone were packed in small boulders and pieces of limerock. Removed pipe which was 4' long, then dug out stone and boulders. Found nothing further. Left only small hole (about 1½' in diameter). Clay down about 2½'. The old corner post was laying down. Set a CIM over a ½" iron at the stone location. The pipe stood .25 E of the center of the stone. Set the stone (packed in boulders) on the North side of the CIM
