7-18-1980 (1980 Remon Book) 1/16 East: Dug from the traverse nail in the center of the E-W road and in line with the fence North; North for 12', East for 3' to 4' and West 5' by 4' to 5' deep to clay. Found nothing. The North end of the hole was cut down into the ditch. The South end had about 2' of wet sticky black dirt beneath the lower road.

7-22-1980 (1980 Remon BK) 1/4 Cor 5-8: Dug from a point 6' West of the traverse nail West for 10', South 2' to 3' and North 8'+. The old road was down 4'½' and there was 1'½' of black dirt beneath the to clay. Found nothing. We were digging to cover the line from the S¼ Cor 8 over the fence at the Center 8 which agreed with doubling the distance from NE 8 over the fence at the 1/16 West and to cover the center of the E-W road and midway between NE 8 & NW 8

7-28-1980 (1980 Remon. BK) 1/4 Cor 5-8: Dug again to cover midway between the section corners and from the center of the E-W road South. Found nothing here. Also dug over the center of the E-W road and a point 4' West of the present ℄ (old C.H.D. topo shows the center of the old road was 4' West of the present ℄). Here we found

#650504 (2)

1/4 Corner 5-8 Salem 106-15

7-28-80 (Continued) a 2" x 2¼" wood stake well over 1" long and driven below the oldest road. This was a sawed piece of oak sharpened to a long point but was larger than the usual CHD hub. and is 5.9 West and 2.5 North of the t.n Today we dug from a point 1' West of the t.n for 14' West, 7' South, and 3½' North.

TN N 3.75 E 6.40

1-1980 C.S. set corner M + L for John Schultz, survey. Will set monument later. This location holds the most 1/16th fence near their proper location, ~~particularly~~ particularly the 1/16 South and 1/16th East and the fence on the N-S 1/4 line Sec 8. The fence at the 1/16 North is gone and wont affect anything. The fence at the 1/16 West won't fit anything. 1962 CHD topo

shows the center of the old road 4' West of the present ℄ (Book 203)
