no other records
1965 JKerr for town road from 1/4 15-16 east.
run mile line N-S between 15-16 very brushy
gullies, power line etc set axle as corner east of
corner post as assumed corner. axle found at base of
brace post of fence running west.
- mear mile north 52'29'

-over-

9-1965 on walking in with C/M to set corner found on digging to set C/M a stone 3 x 12 x 16 vertical also remains very old post one foot south of stone.

– set C/M at compromise between stone & old post it came .95' north and .75' west of axle as set. plaud axle back as anchor to brace terminal this would change C/M set as 1/4 15-16 1/2 given amounts but as line was so rough, could not duplicat anyway.

– Center new 8" creosoted post corner fence N-S-W SW .15'

– steel fence post as witness W. 5'.

– Hub by corner nailed to corner post.
