For Corner on west side of Corner fence post
at Cor. 7-8-17-18 (meas. To E 1/4 7 North 2622.3) poss. bdy set 1/16 N.

1/16th North 10-29-77 Dug with backhoe at Kerr's rod. Found an iron by a shattered limestone .2E and .9'N. Dug deeper and found a stone 4"x8"x15" with stakes on the West side 7' deep. Set a 1¼"x20" pipe in stake hole and iron around the stone. This corner .08'E and 1.58N of Kerr's corner (removed)

LRP: John { 17.9E / 17.9S Iron & shattered stone { 17.7E / 18.8S Set nothing @ surface Stone and Stake { 17.82E / 19.48S

Card #4 7-8-17-18 Oronoco 108-14

In oct. & Nov. 1977 as the result of an elec. Traverse survey in Sections 7, 8, 17, 18 etc #840805 I decided that the location of this Section Corner should go at the location produced from the North. J. Kerr's 1/16 Cor. North has been inplace for many years at this 1/16th Corner and used for all recent Surveys in this vicinity. The Meander Corner location which Kerr called as 170' North, really was 160' North, but upon our more accurate meas I dec.ded To use the M.C for line from the E. 1/4 Sec. 7 To this M.C which makes the 1/16th North about 0.15 East of that line. (over)

Then for N-S Location I ~~doubled~~ used the distance from the 1/16 Cor. N. (Kerr's) To the E 1/4 Cor. 7 and used same meas. South of 1/16 Cor. which now makes the M.C. at 159.09' North of Sec. Cor 7-8-17-18 as we are now going To use it. This location is further substantiated by the distance So of the S.E. Cor. of Public Sq. as shown by J. Kerr = 154.83 and now about 154.7 also the line of S 1/4 Cor 8 from SE 8 as used and Set by T. Fraser 1892 is now about 2' N. of our new location. See Card #3 for 1/16 Cor North info. - note that a stone was found 1.58' North of 1/16 Cor which we are going To use

See Card #5

Card #5 7-8-17-18 - 108-14
#840805

On the back of Card#2 is a sketch of the line East of this Sec. Cor. of some work done in April, 1970. This indicated that a line slightly north of the one used in that survey could be located as per iron rods found 0.41 N. & 0.82' N. of line as used.

Kerr's 1940 meas. from this Sec. Cor. South To E.¼ 18 was 2610.55, it is now 2610.27 and again indicating a point near the Location as chosen.

Note: that M.C. - 159.09' North is To be used in locating this Section Corner in the future.

Note that an iron Rod set ± 254' East (over)

in April 1970 probably should be moved North To coincide with the location of the Sec. Corner.
